Summer Assignment
Algebra II/Trig

Book: Forgotten Algebra

Author Barbara Lee Bleau, Ph.D.

Publisher: Barron's Educational Series, Inc.

ISBN#: 0-7641-2008-5

As a prerequisite for entering Algebra II/Trig in the fall, you are required to complete a set of summer work that will review and introduce topics used in this course. The book you will be using can be purchased or ordered at any local major bookstore. The book provides a nice review and will serve as a reference for future course work. To receive credit for the summer work, you are to read the following units and complete the corresponding problems:

DO THE FIRST FIVE ODD NUMBERED EXERCISES (#1, #3, #5, #7, #9) AT THE END OF THE FOLLOWING UNITS:

UNITS 1-6, 10-12, 16, 18

Clearly label each unit, write out each exercise to be solved, show all your work, and check your answers against the solutions in the back of the book. The entire assignment consists of 55 problems. Full credit will only be given to student papers that are complete.

The assignment is due to the instructor on the first day of school. It would be to your benefit to begin early and not wait until the week before school to start the summer work. This would defeat the purpose of the summer preparation and hurt your chances of success in Algebra II/Trig.
