

Cornelia Connelly School  
Summer Assignment  
Honors Algebra II/Trig

Book: Forgotten Algebra

Author: Barbara Lee Bleau

Publisher: Barron's Educational

ISBN: 0764120085

As a prerequisite for entering Honors Algebra II/Trig in the fall, you are required to complete a set of summer work that will review and introduce topics used in this course. The book you will be using can be purchased or ordered at [myschoolbookstore.com](http://myschoolbookstore.com) or any major bookstore. The book provides a nice review and will serve as a reference for future course work. To receive credit for the summer work and therefore be allowed to take Honors Algebra II/Trig you are to read the following chapters and complete the corresponding problems.

**Complete the odd numbered exercises at the end of the following units:**

**Units 1-12, 15, 16, and 23**

The problems assigned over the summer are due to your instructor on the first day of school. It would be to your benefit to begin early and not wait until the week before school to begin the summer work. This would defeat the purpose of the summer preparation and hurt your chances of success in the Honors Algebra II/Trig course. Good luck and have a productive summer.
